  - 2) Allen-Bradley brand products are not affected by this notification!
  - 3) Slight differences according to the "Feature Comparison" Document need to be considered.

**Dear Ladies and Gentlemen**

We thank you for your many years of trust and investment in our products. As part of a comprehensive support throughout the entire life cycle of our products, we see it as our task, to keep you informed about changes.

Since 1999 we offer opto-electronic sensors for safety and industrial applications under the brand name CEDES. With the acquisition of CEDES Safety and Automation by Rockwell Automation in 2008, our products are now available under the Allen-Bradley brand name. In addition to our products Rockwell Automation offers you a very broad range of industrial automation products as well as extensive services. The Rockwell Automation product and solution offerings enable us to provide a complete safety solution from one source.

Since we can serve you better through this channel, **the product families listed on the front of this document from the CEDES Safety and Automation product offering<sup>1)</sup> are being discontinued.** We will accept last time orders **until April 30<sup>th</sup>, 2014** (with last deliveries May 31<sup>st</sup>, 2014). All orders after this date will only be handled with equivalent Allen-Bradley brand products over the Rockwell Automation sales channel. The normal warranty services and repairs for the above mentioned CEDES brand products will continue.

**From Rockwell Automation you can continue to obtain equivalent products** as well as many other products and services. Your sales contact from Rockwell Automation is available to help with advice and actions and offers you compatible<sup>3)</sup> Allen-Bradley brand products.

We will continue to strengthen our relationship with you during the transition and afterwards through the Rockwell Automation Channel.

Thomas Getzmann
